WORK EXPERIENCES

AI Engineer

Nov 2024 - Oct 2025

Reliance Jio

Mumbai

- Transitioned to **AI Engineering** by integrating **LLMs**, **RAG-based semantic retrieval**, and **conversational AI** into infrastructure operations and ticketing support systems.
- Enhanced contextual understanding of infrastructure incidents by resolving inconsistencies in ticket descriptions (e.g., firewall port failures, TCP connectivity errors, **access-rule related incidents**), improving accuracy during investigations.
- Increased efficiency of incident investigations by surfacing relevant historical resolutions and related infrastructure events, significantly reducing manual knowledge discovery during troubleshooting.
- Achieved a **30-40% reduction** in manual ticket search effort.

Technologies / Skills Used : LLMs, RAG, AI, Chormadb, LangChain, Ollama

AIOps Engineer

Sep 2023 - Oct 2024

Reliance Jio

Mumbai

- Worked on infrastructure automation for enterprise network operations within **CloudXP**, focusing on **firewall**, **DNS**, **load balancer**, **observability**, and ticket management systems.
- Developed monitoring and alert-handling for system failure detection, and built backend APIs and operational tooling for **Cisco ASA Firewalls**, **F5 Load Balancers**, and **Cisco Nexus** network infrastructure.
- Analyzed operational support tickets and identified limitations in traditional rule-based automation approaches due to inconsistent ticket structures and unstructured issue descriptions across enterprise network operations.

Technologies / Skills Used : Cisco ASA, F5 Load Balancers, Cisco Nexus, Python, React, SQL, Flask

ML Engineer

May 2022 - Jun 2023

IIT Madras Research Park

- Built a modular **autonomous perception pipeline** capable of **real-time road scene understanding**.
- Simulated core components of self-driving systems including **object detection**, **classification**, **segmentation**, and lane tracking.
- Published a technical white paper documenting the system architecture, perception workflow, and implementation approach for autonomous driving simulation environments.

Technologies / Skills Used : Pytorch, Tensorflow, Yolo, Audacity, CARLA, Autonomous Perception, Segmentation

PROJECTS

Autonomous Job Hunt Agent | 🐙 Github

2025 - 2026

- Developed a multi-agent AI system leveraging LLMs, RAG, browser automation, and workflow orchestration to automate end-to-end job search activities.
- The platform integrates job discovery, profile matching, resume optimization, application tracking, and interview preparation into a unified workflow.

Technologies / Tools Used : Python, FastAPI, React, Chromadb, Docker, Ollama, n8n

SKILLS

Programming Languages :	Python, C, JavaScript, SQL
Frameworks & Libraries :	FastAPI, LangChain, Django, Node.js, React, Flask, Keras, Tensorflow, Pytorch
Databases :	Vector DB, MySQL, SQLite, Firebase
Soft Skills :	Critical Thinking, Time Management, Decision Making
Tools & Platforms :	Docker, OpenAI API, GitHub, Postman, Chromadb

EDUCATION

Terna Engineering College | Mumbai

2019 - 2023

B.Tech CSE

CGPA : 8.6

ACHIEVEMENTS

- Qualified GATE Data Science & AI exam among **100000+** candidates nationwide (03/2026) with **AIR 4561** in: **Data Science & Artificial Intelligence**.
